

## Symantec Control Compliance Suite (CCS) 11.0 Module Course Options

### MODULE COURSE DESCRIPTION

The *Symantec Control Compliance Suite (CCS) 11.0 Module Course Options* is designed to enable IT professionals on the additional modules outside the standards manager module which is covered in the CCS 11 Administration Course. These modules each provide specific capabilities to CCS which help allow for a comprehensive compliance and security program for organizations. This instructor-lead course will focus on the implementation and management of the separate modules with hands on experience with the solutions.

**Delivery Method**  
Instructor-led

**Duration**  
1 day

### Course Objectives by Module

By the completion of this course, you will be able to:

#### Risk Manager:

Define risk management concepts as they relate to Control Compliance Suite.  
Use the Risk Manager module to manage risk in your environment.  
Utilize the different types of risk scoring methods.  
Take action on defined risks.

#### Policy Manager:

Recognize common policies and how organizations use them  
Define a process for keeping policies reviewed and up to date  
Use the Control Compliance Suite Policy Module to manage policies

#### Assessment Manager:

Explain the need for procedural controls to securing an environment.  
Install and configure the Control Compliance Suite Assessment Module.
