

ProxySG 6.7 Diagnostics and Troubleshooting

COURSE DESCRIPTION

The ProxySG 6.7 Diagnostics and Troubleshooting course provides a structured approach to diagnosing and solving common troubleshooting issues related to ProxySG deployments. The course will emphasize hands-on experience, with extensive opportunities to build competency in the use of the powerful diagnostic tools available on the ProxySG.

Delivery Method

Instructor-led and Virtual Academy

Duration

One day

Course Objectives

By the completion of this course, you will be able to:

- Describe the troubleshooting methodology as recommended by Symantec.
- Diagnose and solve a variety of access and performance issues using tools such as sysinfo files, packet captures, and policy traces.

Who Should Attend

The ProxySG 6.7 Diagnostics and Troubleshooting course is intended for students who wish to gain familiarity with ProxySG troubleshooting techniques and tools.

Prerequisites

This course assumes that students have completed the ProxySG 6.7 Basic and Advanced Administration courses.

Hands-On

This course includes practical hands-on exercises that enable you to test your diagnostic skills in a working environment.

COURSE OUTLINE

Module 1: ProxySG Secure Web Gateway—Diagnostics and Troubleshooting Overview

- Brief review of the ProxySG-based Secure Web Gateway solution
- Overview of common issues related to internal resources, external dependencies, SSL interception, and policy efficiency

Module 2: Exploring Sysinfo Files

- Description of how to generate sysinfo files and what information they contain
- Using sysinfo files as a key tool in diagnosing troubleshooting issues

Module 3: Troubleshooting Issues Related to Authentication

- Methods for diagnosing and solving issues related to authentication, focusing on IWA direct and IWA BCAA realms.
- Includes issues related to surrogate credentials and Schannel congestion

Module 4: Troubleshooting Issues Related to DNS

- Methods for diagnosing and solving issues related to DNS lookups
- Includes both forward and reverse DNS lookups, and DNS imputing

Module 5: Troubleshooting SSL Interception Issues

- Methods for diagnosing and solving issues related to SSL interception
- Includes connection and performance issues

Module 6: Troubleshooting Performance Issues Related to Policy Efficiency

- Methods for optimizing performance through tips for creating more efficient policies
