

Desktop and Laptop Option

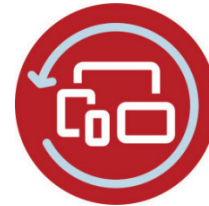

Automated endpoint data protection for Windows and Mac.

Automated endpoint data protection for Windows and Mac.

Veritas™ Desktop and Laptop Option is a user centric backup solution that provides flexible implementation and centralized administration for endpoint data protection of Windows and Mac desktops and laptops in the organization. This highly scalable standalone solution offers distributable components making it suitable for environments of any scale, be it single-site, multi-site, or having remote offices, allowing you to protect even the most recent files in the endpoints.

- Protect endpoints automatically regardless of the connected network without any user intervention.
- Backup instantaneously with RPO of seconds including support for work-in-progress documents.
- Protect the most challenging big data and hyperconverged environments.
- Customize backup configurations for a fail-safe plan against ransomware threats.
- Empower end users in the organization with self-restore capabilities.
