

# NetBackup Appliances

Simple and efficient backup, storage and deduplication on a single device.

## What's new in NetBackup Appliances!

Veritas Predictive Insights delivers always-on proactive support. Utilizing encrypted data from thousands of Veritas appliances, Predictive Insights' cloud-based Artificial Intelligence/Machine Learning Engine detects potential issues and monitors system health to create proactive and prescriptive remediation before problems can occur. Predictive Insights enhances Veritas product and customer satisfaction and helps customers:

- Increase operational availability.
- Resolve potential issues before they occur.
- Reduce TCO by optimizing storage investments and avoiding over provisioning.

## Simplify enterprise data management with agile, scalable, integrated appliances.

NetBackup Appliances integrate multiple components into a single device, streamlining management, operation, and support—and saving you money and critical IT resources. Tight integration with NetBackup software gives you a way to cut costs and remove complexity across the entire organization.

- Save time and money vs. building your own media server.
- Easily scale capacity and performance as your organization grows.
- Quickly deploy new data protection capabilities.
