

# NetBackup

Enterprise data backup and recovery optimized for the multi-cloud.

## The future of Enterprise-Class Data Protection is here!

Veritas NetBackup reduces the complexity of enterprise data backup and protection, scales with growth, and increases agility so IT can transform from cost center to business enabler. NetBackup outpaces the relentless growth of the data center with innovative performance technologies, efficient storage techniques, and by providing fast, easy recovery for any data you need. As IT transforms from cost center to business enabler, NetBackup is engineered to solve the diverse challenges of today and tomorrow and ultimately give organizations the confidence to move faster and take bigger risks trusting that their information will be safe.

### Unified Data Protection for Cloud, Virtual, Physical, and ModernWorkloads.

Data is growing rapidly and becoming more fragmented across clouds, virtual environments, and ever-changing application platforms. Unified data protection is the only way your IT organization can deliver required service levels while limiting cost and risk—whether data resides on-premises or in the cloud.

- Eliminate the complexity of point solutions and infrastructure management.
- Scale gracefully to mitigate spiraling storage costs and expand into the cloud.
- Protect the most challenging big data and hyperconverged environments.
- BSimplify administrative tasks for any user, down to a few clicks.
- Deliver as-a-service to streamline operations and improve service levels.
