

EMPOWERING THE FIRST LAYER OF DEFENSE, ONE EMPLOYEE AT A TIME

Take a proactive approach with dark web, phishing, and education

Ransomware is an epidemic for small to midsize businesses and email phishing scams continue to be the attack vector of choice for cybercriminals. However, technology alone **cannot** provide adequate security defense. Employees must be trained to avoid common security threats.

Recent security reports reveal, that 95% of data breaches are caused by employee error. Without proper training to spot and avoid falling victim to phishing attempts, employees will continue to be the weakest link in an organization's security defense.

NetX Security Awareness Service helps to transform a business' weakest link into their strongest defense!

“NetX Security Awareness Service goes beyond just a training platform. Hosted, Managed and Monitored by a NetX dedicated security engineer.”

Client Focused

NetX Security Awareness Service is a robust security platform that protects our clients business', by providing customized security awareness training, simulated phishing campaigns, detailed security policies and thorough security risk assessments, all through a single client-branded portal.

Why use NetX?

- Rich training modules that encourages employee engagement and security adherence
- Consistent platform enhancements based on client feedback and market trends
- Real-world security training modules
- Flexible phishing campaigns & extensive template library

The NetX Difference:

- Hosted and Managed Platform
- Email Domains Monitored for Compromise
- Monthly Security Newsletter
- Creation of Security Policies
- Ensure Employee Training Completion
- Perform Phishing Simulation Attacks

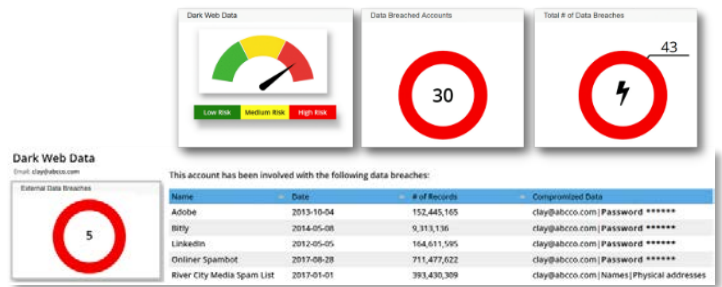

Dark Web Breach Assessments (DWBA) & Security Training

With our standard level of service, we run a Dark Web Breach Assessment on up to 3 domains. This robust dark web breach assessment, allows NetX to evaluate your potential exposure, and identify breached credentials on the dark web that may be putting your business at risk!

NetX also performs insightful phishing campaigns to test employee security mindfulness, as well as and roll out engaging security awareness training.

- Show your management that data breaches can happen to anyone
- Prove security risk with a free Dark Web Breach Assessment and phishing campaign
- Convince your management they need security awareness training, to help protect the business from data theft

Dark Web Breach Assessments (DWBA) analyze the security risks to an organization based on breached employee data.

NetX Security Awareness Service & Employee Vulnerability Assessment (EVA)

Make education continuous with our **Managed Security Awareness Service**. Invaluable client branded services like weekly micro-trainings, informative security newsletters, simulated phishing campaigns, continuous DWBAs, and security risk assessment for one low monthly cost. Our revolutionary Employee Vulnerability Assessment (EVA) combines security metrics into an Employee Secure Score (ESS), so our clients can see which employees are their weakest links! By quickly determining an employees ESS, we can confidently recommend security remediation services to help our clients strengthen their security posture!

- Increase employee engagement by monitoring individual ESS!
- Employees stay engaged with friendly competition via a leaderboard!
- Test employee retention and run simulated phishing campaigns!

The Employee Vulnerability Assessment (EVA) raises the bar when it comes to employee defense.
