

KACE as a Service

Discover the power of systems management without the on-site hardware.

Comprehensive, cloud-based systems management for all network-connected devices

Give your IT staff more time to innovate by streamlining systems management with KACE as a Service. This hosted version of the KACE Systems Management Appliance delivers the same comprehensive endpoint management — from the cloud. You can:

- Discover and inventory all hardware and software network-wide
- Install applications remotely
- Automate patching of applications and operating systems
- Optimize software license usage and ensure compliance

Plus, with your own dedicated virtual appliance instance hosted in a secure, high-availability data center, you can eliminate upfront capital costs, and reduce infrastructure costs and budget for systems management through operating expenses.
