866-638-9462 or 609-298-9118
simplehelp@netxinc.com

New KACE customers can now receive five free licenses of SimpleHelp's **Business Edition** Remote Control and Monitoring Software. SimpleHelp is now bundled with KACE Systems Management and Deployment appliances as an easy and cost-effective way to enhance customers remote support options.

NetX is the authorized distributor for the SimpleHelp Suite of products. We provide pre-sales, demonstrations, web, email, and phone-based technical support.

As part of this offering, installation and training are included, at no additional cost. We can have your system up and running in hours, fully deployed, and your staff trained.

To enroll, please visit simple-help.com/kace and use Promo Code **SHFREE-375**.

Quest KACE remote support integration advantages:

Support Remote Users Powerful tools increase team productivity

- Multiple simultaneous remote sessions allow you to connect to multiple users at the same time.
- Virtual queues of users let you specify which users a technician is able to view and support.
- Transfer a session to a colleague to both support the same user.
- Create technician groups to simplify management of many technicians.
- Session recording, history and advanced logging allow you get historical support related information.
- Multi-language, multi-locale support.
- Fetch and modify remote files and folders without a starting session.

Device Monitoring Continuously gather metrics

- CPU and memory utilization allow you to easily see what resources are being used.
- Continuously updating screenshots help keep track of remote machines without starting a session.
- Identify processes utilizing the most CPU to find out which applications are making your customers wait.
- Disk space across multiple drives helps identify when a disk is running low on disk space.
